

Plans to launch new products and showcase latest technology

NBG Printographic's debut in Paperex

NBG Printographic Machinery Will be participating in Paperex for the first time this year. Paperex 2017, the international exhibition and conference on paper, pulp and allied industries, will be held at New Delhi's Pragati Maidan from 1-4 November 2017.

NBG Printographic Machinery offers a wide range of customized and innovative paper converting and packaging solutions for all market segments to meet the dynamic and ever growing requirements for reliable and technologically advanced paper converting and printing equipment. The company is a well-known manufacturer of A4 copier sheeters, slitter rewinders, heavy-duty sheeters, etc. NBG is a channel partner for Jiangsu Fangbang machinery of China, which is a leading manufacturer of paper bag converting machines.

NBG aims to position itself as a prominent source for supplying paper converting equipment. The company is looking forward to showcase its latest technology and

launch some new products for the paper industry. Since it is the company's debut at the Paperex show, it hopes to receive good footfall at the event.

The Indian paper industry shows sign of promising growth owing to a rise in domestic demand for paper. "The focus of the Indian paper industry has shifted towards eco-friendly products and technology following the rules and regulations implemented by the Government of India," says Nitin Garg, commercial director of NBG.

The technological advancements in machinery, quality standards and production capacities have made a significant boost to the industry. "Many global companies are expected to invest in this sector due to favorable working conditions. India is the fastest growing market globally and presents an exciting scenario. The paper industry in India is poised for a big leap forward in sync with the economic growth," he adds. ♦
